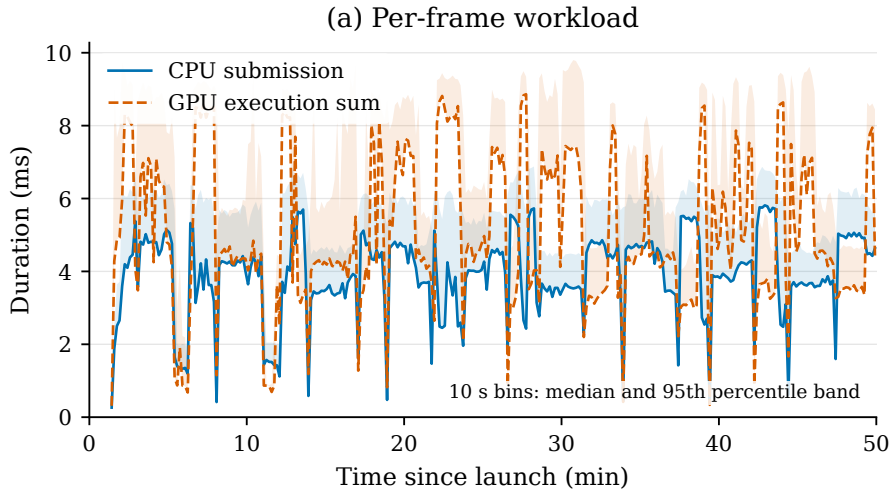
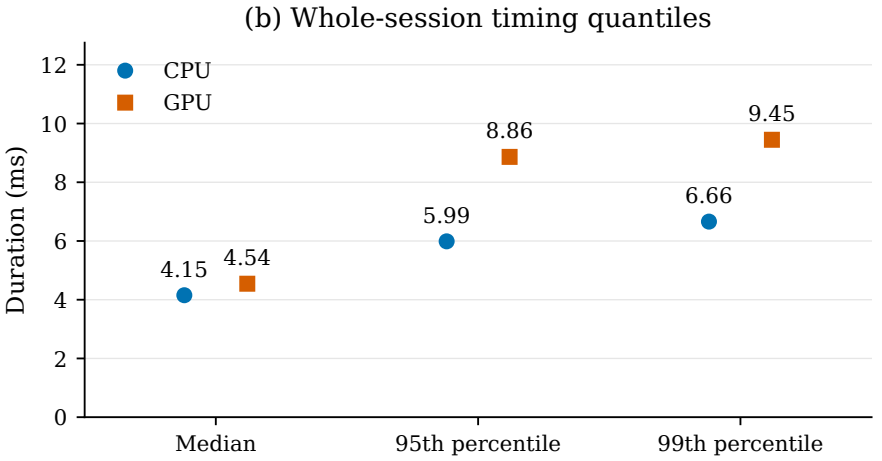
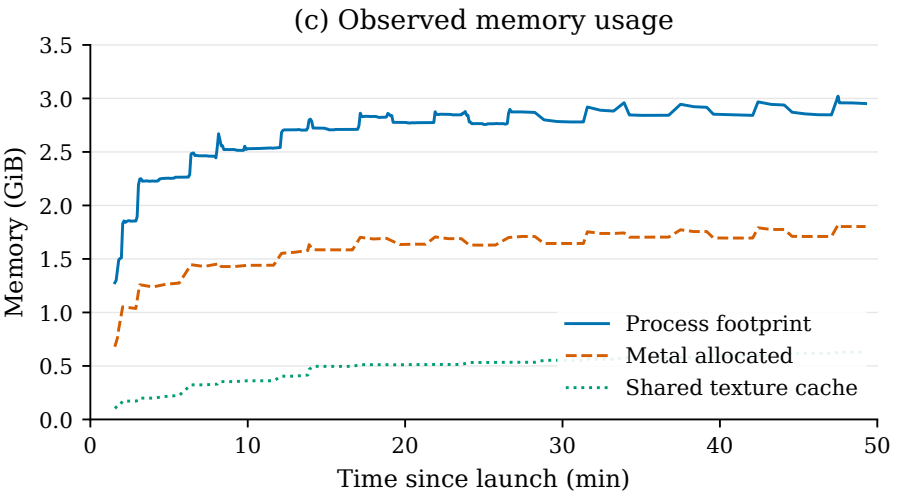
Runtime performance and memory retention

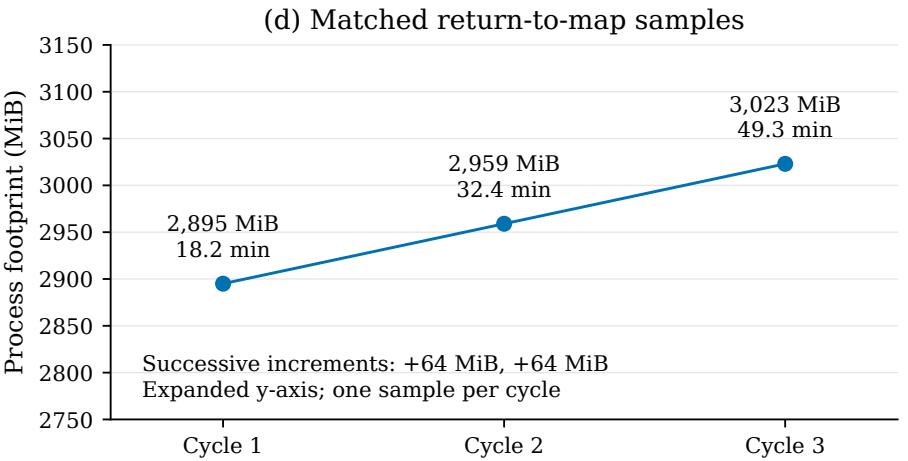
Super Mario Bros. Wonder 1.2.1 | Apple M5 Pro, 48 GB | macOS 27.0

Single continuous session, three course cycles | Host 968a4f053bda









All recorded activity included; missing timing samples excluded. CPU and GPU durations are not additive.

Memory series overlap and must not be summed. The third course covers its entrance area only.

Actual-presentation coverage is incomplete; no FPS or input-latency claim is made.
